- Optimized MySQL, MongoDB, and ElasticSearch database queries, improving query performance by 35%.
- Implemented and tested Kafka messaging for scalable event-driven processing.
- Designed and deployed microservices using Docker & Kubernetes, improving service uptime by 40%.

may 2022 - september 2023
Scalo Sp. z. o. o. - contract
Senior Software Engeener at Santander Bank Polska

- Led migration of workflow software from Java 11 to Java 17, enhancing performance and security.
- Integrated Spring Boot 3.0 and optimized microservices, reducing deployment times by 25%.
- Refactored PostgreSQL queries, increasing database efficiency by 30%.

may 2014- april 2022
Agora S.A. Warsaw | Torun
software developer

- Built a digital subscription system for Wyborcza.pl, increasing customer conversions by 20%.
- Migrated legacy systems from Java 7 & Spring 4.1 to Java 8 & Spring Boot, reducing system crashes by 35%.
- Developed a marketing automation platform with Java 11, Kotlin, and Docker/Kubernetes, improving campaign efficiency by 50%.

dec. 2015 - mar. 2017
Jirav Ltd., San Francisco, remore work
consultand/developer

- Deployed Jenkins CI/CD pipelines on AWS, reducing deployment failures by 40%.
- Developed revenue forecasting tools, integrating sales data processing with Spring Boot & Java 11

Education

2012
postgraduate "Businness Application in Java"
Lodz University of Technology

2007
MSc in Computer Physics
Nicolaus Copernicus University

may 2011 - april 2014
MyDeal Sp. z. o. o.
PHP developer
Built and maintained an e-commerce platform in PHP5 & MySQL, optimizing transaction processing by 30%.

dec. 2007 - mar. 2011
CTDP Sp.z.o.o
PHP developer

Developed ERP-class software for telesales support, reducing operational inefficiencies by 25%.
